**SEPARATOR FOR NON-AQUEOUS ELECTROLYTE CELL**

Examiner: K. Han    SN: 10/540,837    Art Unit: 1795    May 1, 2009

**DETAILED ACTION**

1. The Applicant's amendment filed on January 15, 2009 was received. Claims 1-3, 6, 8, and 9 were cancelled. Claims 4, 5, and 7 were amended.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 102***

3. The claim rejections under 35 U.S.C. 102(b) as being anticipated by Yamaguchi et al. on claims 1-2, and 8-9 are withdrawn, because claims 1-2 and 8-9 are cancelled.
4. The claim rejections under 35 U.S.C. 102(b) as being anticipated by Yun et al. on claims 1, 3, and 6 are withdrawn, because claims 1, 3, and 6 are cancelled.

***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 4, 5, and 7 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3, 4, 5, 7, and 8 of copending Application No. 10/508086. Although the conflicting claims are not identical, they are not patentably distinct from each other because the positive electrode formed by applying a paste of the phosphazene derivative material essentially forms the separator for the electrolyte cell.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The provisional rejection has been withdrawn in view of Applicant's correspondence on April 22, 2009 stating the copending Application No. 10/508086 has been abandoned and will not be revived.

### ***Reasons for Allowance***

7. The following is an examiner's statement of reasons for allowance:

Claims 4, 5, and 7 are allowed in view of Applicant's amendments and correspondence stating application 10/508086 has been abandoned and will not be

revived. The invention of independent claims 4, 5, and 7 recite a separator for a non-aqueous electrolyte cell comprising a microporous film formed by adding a phosphazene derivative and/or an isomer of a phosphazene derivative to a polymer represented by formulas I, II, III, IV, VI, or VII. The closest prior art of record Yamaguchi et al. and Yun et al. teach the use of a separator comprising phosphazene but not represented by formulas I, II, III, IV, VI, or VII.

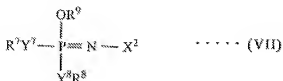

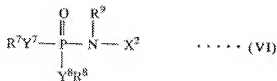

Claim 4 is allowed because the prior art does not disclose or suggest a separator for a non-aqueous electrolyte cell, wherein the phosphazene derivative of the formula (II) is a phosphazene derivative represented by the following formula (III):

Claim 5 is allowed because the prior art does not disclose or suggest a separator for a non-aqueous electrolyte cell, wherein the phosphazene derivative of the formula (II) is a phosphazene derivative represented by the following formula (IV):

Claim 7 is allowed because the prior art does not disclose or suggest a separator for a non-aqueous electrolyte cell, wherein the isomer of the phosphazene derivative is an isomer represented by the following formula (VI) and of a phosphazene derivative represented by the following formula (VI or VII):

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
